

NASH'S NUMBERS

You may remember the June issue gave a list of fares by distance. This month we add to this by giving you an A-Z list with how much the metered fare should be for that familiar "how much to" question. The fares quoted are from **Trafalgar Square** and each one has been calculated for distance by a reliable computer package suggesting the quickest route, which usually gives a slight percentage in your favour to use main roads. However it does not take account of "**Time Related Charges**" so it is wise to suggest the fare as a minimum. If you have any suggestions or comments for this or future issues, please leave me a message on my voice mailbox anytime, 0181 506 1000 mailbox number 0195.
