

Nash's Numbers

by Alan Nash (A95)

Nothing outstanding this month, its just post codes. We all know our postcodes but isn't it strange when you are offered a job in another zone, the brain goes into neutral ? Now you have all the codes in one place and has been updated to reflect recent changes. They are in strict alphabetical order to assist a quick find when offered a job rather than know where you are when dropping off a customer. See relevant notes at the bottom of page where there is a star and a number.
