

Nash's Numbers by Alan Nash (A095)

Elsewhere in this issue you will see an article about Addison & Lee's PR machine claiming that they are 30% cheaper than Licensed Cabs. More and more people are believing this propaganda, similar to clip board Johnny's telling punter that black cabs cost a minimum of £40. So I have set out below a few journeys, the charge made by A&L for a cash fair, the mileage and what this would cost in a licensed cab (based on distance at T1).

All drivers should help in *our own* propaganda in promoting *our own* service in that we are not as expensive as we are made out to be.
